

Data room — pre-seed application

HR and payroll for Romanian SMEs in one app: staff clock in from their phone, leave and payroll calculate themselves, and REGES filings go straight to the labour inspectorate. Timișoara, Romania. Prepared 6 October 2026.

€100k

pre-seed round sought

€1.25M

pre-money (founders' proposal)

15 months

runway with zero revenue

0

paying customers today

Every financial figure comes from the financial model; market figures carry their own sources, listed in the appendix of the business plan. Anything dated after 6 October 2026 is a **projection**. We have **zero paying customers**: the product has been live since early September 2026 and an accountant pilot opened on 6 October 2026.

REGES-Online is the electronic employee register that every Romanian employer files with the Labour Inspectorate (ITM). Currency is EUR; RON is converted at 5 RON = 1 EUR.

1 Overview

Pitch deck PDF

The application deck: problem, product, team, market, business model, traction and the ask.

available

Business plan PDF

Long-form plan: company and founders, problem and regulation, product, market, competition, pricing, go-to-market, traction, financial plan and risks.
