

PRE-SEED · INVESTOR PRESENTATION · OCTOBER 2026

ADMINISTRATIVO

HR for Romanian SMEs in one app: staff clock in from their phone, leave balances keep themselves up to date, and REGES-Online filings go to the Labour Inspectorate over its API.

Payroll is built and undergoing accountant validation.

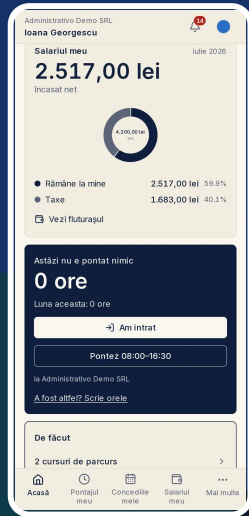

€250k pre-seed

administrativo.ro

Timișoara, Romania

Employee portal, phone (demo company)

Every Romanian employer owes the state the same HR paperwork

About half a million companies employ staff. Each one must keep a daily time record and report every hire, change and termination to the Labour Inspectorate (ITM), with fines counted per employee.

≈526,000

Romanian companies employ at least one person (FY2025), with 3.88M staff in total

3,000–8,000 RON

fine *per person* for late or missing REGES-Online data (≈€600–1,600; 5 RON = 1 EUR)

1,500–3,000 RON

fine for not keeping a daily record of start and end hours (Labour Code art. 119 and art. 260)

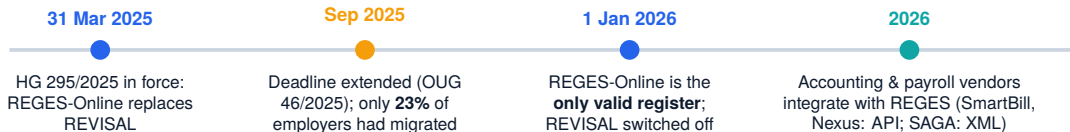

What a 10–50-person firm must run, every month

-  A **daily start/end record** for every employee. Paper and Excel are legal, and both can be rewritten after the fact.
-  **REGES-Online:** a new contract by the day before work starts; other changes within 3–20 working days.
-  Leave requests and balances, public holidays, approvals.
-  Health & safety (SSM) briefings, medical checks, fire extinguishers, vehicle documents: each with its own expiry date.
-  Month-end hand-over of hours and leave to the accountant, who runs payroll.

Sources: ICAP CRIF FY2025 via Curierul Național (Jul 2026); fines: HG 295/2025 art. 9 as summarised by pontajangajati.ro and universuljuridic.ro; Labour Code art. 119/260 via lege5.ro and ITM Arad; REGES deadlines: Legislația Muncii 2026 guide. Full URLs: Data room › 5 Market research, §a.1, §b.1–b.3. REGES-Online: the Labour Inspectorate's mandatory electronic employee register.

Why now: REGES-Online made HR reporting an API, from 2026

Since 1 January 2026 every employer reports through REGES-Online, a register that software can call directly.

↑ What this opens for us

- 🔌 Reporting is now a machine-to-machine call: the HR record *is* the filing.
- ⚖️ EU Pay Transparency Directive: Romania missed the June 2026 deadline; a draft law is in Parliament.

⚠️ Risk, disclosed

HG 295/2025 was annulled at first instance (2 Apr 2026). **Not final**; suspension refused, so REGES-Online still applies. The register (Labour Code art. 34) and daily timesheet (art. 119) duties do not depend on it.

Sources: Portal Legislativ (HG 295/2025; OUG 46/2025 art. IV); Inspecția Muncii note on the extension; Avocatnet (23% figure, 2025); Nexus, SmartBill, SAGA docs (REGES integrations); StartupCafe, Juridice.ro, Profit.ro (annulment, Apr–May 2026); Legislația Muncii, Business24 (Directive). Outcome of the recourse: unknown as of 6 Oct 2026. URLs: Data room › 5 Market research, §b.

One app for the employer side of HR, which the accountant sees too

Each person works on the same employee record from their own screen. Filings and payroll files come out of that record, not out of retyping.

FLAT PRICE PER COMPANY

FIRST MONTH FREE

BROWSER + INSTALLABLE APP

ANDROID APP IN INTERNAL TESTING

Sources: the product code and live database, 6 Oct 2026; product mockups in the data room. D112 is generated, not filed; no ANAF (tax authority) or bank connection. SSM: occupational health & safety.

Where we are different

The employer's daily work, on one record

Phone clock-in, leave, SSM, fleet, inventory, onboarding, courses, reviews: 19 modules on one employee record, which the accountant sees too. Accounting suites start from the payroll run; time-tracking apps cover one task. One flat price per company, not per user.

REGES over the API: parity, not a moat

Accounting suites (SmartBill, Nexus) already file over the API. Ours files from the employer's own record, with the employer's credentials stored encrypted; receipts come back onto the record. Live since 17 Sep 2026.

Isolation enforced by the database

Row-level security **forced** on 160 of 164 tables, 443 policies, so a bug in an ordinary user query cannot return another company's rows. Service-role paths are limited by lint rules and must filter by company explicitly. National ID (CNP) and IBAN encrypted (AES-256-GCM); append-only audit log; 5 roles.

Low cost per feature

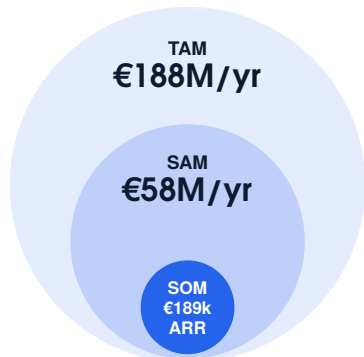

In 51 days since the first commit: **811** commits, **162** database migrations, **5,610** automated test cases, CI gates on every change. Development is AI-assisted, and we say so: it keeps each feature cheap. It is not, by itself, a barrier to copying.

Honest view: at pre-seed our edge is breadth on the employer side at a flat price.

Switching costs grow with each month of employee history stored.

Sources: git history and live database catalogue, 6 Oct 2026; competitors: Data room > 5 Market research, \$c. Test count is a static count of test cases in 433 files. Tables without FORCE are global catalogues (features, role permissions, platform admins, memberships) and still have RLS enabled.

Market: €188M a year at our own entry price

Circles not to scale.

- 🌐 **TAM, derived.** €188M a year: every employer with ≥ 1 employee ($\approx 526,000$) $\times$ HR core at 149 RON $\times$ 12.
- 🏢 **SAM, derived.** €58M a year: 29,461 firms with 10–19 people at 398 RON/month, plus 24,920 firms with 20–249 at 499 RON. Understated: no price above 20 employees is published yet.
- 🎯 **SOM, projection.** €189,133 ARR = base case, 300 paying companies at month 36 (Dec 2029), i.e. 0.057% of employers. Conservative case €44k, upside €489k.
- 👤 **Not added to SAM:** micro-employers (1–9) reached through accountants, €16.8M/yr if 10% are reachable (that 10% is our assumption).

Sources: employers with ≥ 1 employee: ICAP CRIF FY2025 via Curierul Național; size classes: Eurostat SBS 2023 (sbs_sc_oww, persons employed, owners included); prices: administrativo.ro price list. FX 5 RON = 1 EUR. Formulas: financial-model.xlsx and Data room › 5 Market research, §e.

Business model: flat monthly subscription per company

Package (up to 20 employees)	RON/mo	≈ €/mo	Mix*
HR core: attendance, leave, personnel files, portal	149	29.8	45%
Extended HR: + REGES, SSM, onboarding, courses, reviews, KPI	249	49.8	25%
Operations: + fleet, maintenance, inventory, announcements, ticketing	229	45.8	10%
Finance: + payroll, per diem, reports	219	43.8	5%
Whole application (all 15 add-ons)	499	99.8	15%

*Plan mix is a model assumption. Add-on modules 15–69 RON/month each. Above 20 employees: quoted, no published price yet.

Terms, as published

-  First month free, any configuration
-  No setup fee, no implementation invoice
-  Final prices: seller not VAT-registered
-  Accountants: free account, 20% commission for 6 months
-  Invoicing manual today; no payment integration yet

UNIT ECONOMICS, PROJECTION (base case, model year 2)

€1,583

LTV

3.3×

LTV / CAC

10.1 mo

CAC payback

3%

monthly churn
(assumption)

Benchmarks: ChartMogul's 6.1% median churn is for ARPA < US\$25; ours sits in the US\$50–249 band, which retains better, so 3% is an assumption to prove (conservative case: 5%). Payback: SMB median ≈ 11 months, but 3–9 is typical below US\$5k ACV, so ours is above that.

Sources: price list on administrativo.ro/en/preturi and in the product code; unit economics: financial-model.xlsx, "Unit economics" and "Scenarios" sheets. Benchmarks: ChartMogul (churn by ARPA band); Aleph (SMB CAC payback, secondary source). Data room > 5 Market research, §d.1. FX 5 RON = 1 EUR.

Go-to-market: accountants first, search second

1. Accounting practices

Small employers already rely on an accountant for payroll and REGES. **Pilot opened 6 Oct 2026:** 10 places for practices, sign-up until 15 Nov, 1–3 client companies each, free until 31 Mar 2027, then 20% commission for 6 months. **Signed so far: 0** (6 Oct) **[TO CONFIRM: update before submitting]**.
≈18,400 practices (CECCAR, as reported).

2. Search and free tools

7 free tools with no account (salary calculator, leave request, timesheet...), 8 legal guides (REGES-Online, ITM inspection, overtime...), 19 module pages. Organic search is just starting.

3. Self-service

Sign-up creates the company on a trial; first month free; Excel import of employees with a per-row error report. Low-touch by design.

★ What the round adds (plan)

Partner & sales manager for accountants from month 3, onboarding specialist from month 4, content/SEO/ads budget. Projected fully loaded CAC €479 (paid ads €320); base case 50 paying companies by month 12, 150 by month 24.

Sources: pilot terms on administrativo.ro/pentru-contabili; free tools and guides on administrativo.ro. Practices: CECCAR 2025 AML sector report, 31 Dec 2024, as reported by a secondary source (PDF not yet checked): 12,776 firms + 5,671 individual practitioners (Data room › 5 Market research, §a.4). Hires and CAC: [financial-model.xlsx](#) (projection).

Traction: product live, no revenue yet; pilots come next

0

paying customers today

Pre-revenue. Free use only (demo company, pilot). We will not count free users as customers.

- ✓ 17 Aug 2026: first commit
- ✓ Early Sep 2026: live at administrativo.ro
- ✓ 17 Sep 2026: first live REGES-Online API transmission
- ✓ 6 Oct 2026: accountant pilot opened

📈 Web: pre-launch, SEO just starting

- 👤 ≈7 genuine external visitors from Romania in a month (3 Sep–6 Oct)
- G 201 impressions, 3 clicks in Google Search since 2 Sep
- 📊 Average position from ≈50 to 5–20 by end of September
- 🔍 Top query “program salarizare” (payroll software): 43 impressions, position ≈61

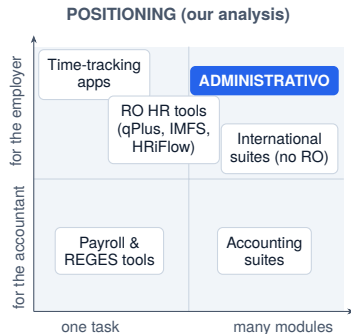

Counts, 6 Oct 2026: signed pilot agreements 0; LOIs [TO CONFIRM: n]; non-demo companies using it [TO CONFIRM: n]; qualified practice conversations [TO CONFIRM: n].

Before the accelerator (by Jan 2027): signed pilots, weekly use of attendance and REGES. **During it:** paid conversions from Apr 2027.

Sources: git history and live database catalogue, 6 Oct 2026; web analytics: Umami (3 Sep–6 Oct 2026) and Google Search Console, measured 6 Oct 2026. Android app built and in internal testing, not yet in Google Play; no iOS app.

Competition: crowded on payroll, thin on the employer's daily HR

Product	Built for	REGES	Public price
SmartBill Conta	Accountants: accounting + payroll	Yes, API	€0–79 + VAT per client/mo
SAGA C / Web	Accountants: accounting + payroll	Yes, XML	600–2,500 RON/yr (3rd party)
Nexus Salarii, NextUp	Payroll	Yes	Not public
qPlus, IMFS One, HRiFlow	HR documents, timesheet, REGES	Yes	Partly public
Charisma HCM, colorful.hr	Enterprise HR & payroll	Not confirmed	Not public
Pontajj, epontez, PontajAngajati	Time tracking only	No	€9–49/mo flat or 10–12 RON/user
Factorial, Personio, BambooHR	International suites	None found	From US\$8/user/mo
ADMINISTRATIVO	The employer, 1–250 staff	Yes, API, live	149–499 RON per company/mo

Our lane: the employer's daily HR work with Romanian compliance built in, at a flat price.

Why pay if the accountant runs payroll and REGES? We take daily time, leave and SSM work off the employer and hand the accountant clean data, not replace their payroll.

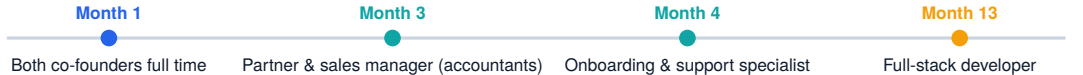

Sources: vendor sites and price pages fetched 6 Oct 2026 (smartbill.ro, sagasoftware.ro, nexuserp.ro, nextup.ro, qplus.ro, imfs.ro, hriflow.ro, charisma.ro, sdworx.ro, pontajj.ro, bamboohr.com). "None found" or "Not confirmed" means no public evidence, not proof of absence. Details: Data room > 5 Market research, §c.

Team: two technical co-founders who built the platform

 Miroslav Maletici Co-founder · 51% today Owns: [TO CONFIRM: title, areas] Student, Politehnica University of Timișoara (UPT), [TO CONFIRM: programme, year, prior work]. Made the first commit on 17 Aug 2026; commits code. Time on the company today: [TO CONFIRM: hours/week]	 Răzvan Pervulescu Co-founder · 49% today Owns: [TO CONFIRM: title, areas] Student, Politehnica University of Timișoara (UPT), [TO CONFIRM: programme, year, prior work]. Commits code to the same repository. Time on the company today: [TO CONFIRM: hours/week]	 Company  WISELEARNING S.R.L., Timișoara, reg. 2024 [TO CONFIRM: investee]; 2024–Aug 2026 [TO CONFIRM: activity]  Two founders, no investors, no options issued  Both full time from the close (month 1) [TO CONFIRM: how studies fit]  10% option pool planned to hire
---	--	--

Gaps we are filling: payroll domain expertise and B2B sales. A partner & sales manager for the accountant channel joins in month 3; an accountant validates the payroll legal values (May 2027). No advisors yet [TO CONFIRM: advisors].

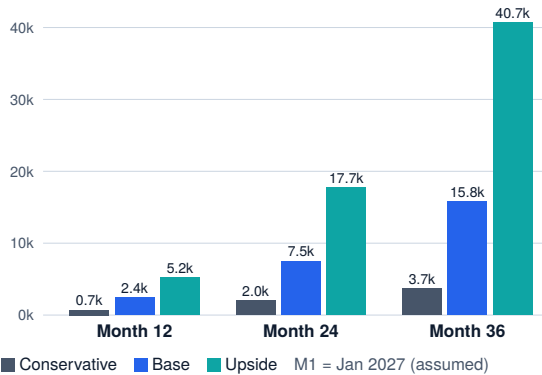

Hiring plan funded by the round

Sources: founders' statement (cap table, roles); git history (both founders commit code, UPT e-mail addresses); legal operator and trade register no. J35/2618/2024: administrativo.ro; hiring plan and salaries: financial-model.xlsx, "Assumptions" sheet. Option pool: cap-table.xlsx (virtual/phantom scheme while the company is an SRL, to be confirmed).

Projections: a deliberately modest base case

MRR BY SCENARIO (€, PROJECTION)

	Conserv.	Base	Upside
Paying firms, M12	15	50	110
Paying firms, M24	42	150	344
Paying firms, M36	77	300	733
ARR at M36	€44k	€189k	€489k
Revenue, year 3	€35k	€144k	€364k
Costs, year 3	€194k	€204k	€225k
Break-even month	after M36	after M36	M23
Cash M36, no seed	-€181k	-€50k	€222k

Base is not default-alive. It reaches 100 paying companies in Jul 2028 (month 19): that is when the seed raise starts, inside the 25-month runway. Monthly churn 3%; 300 companies at M36 is half the 600 in our top-down sketch.

All figures: financial-model.xlsx (2,715 live formulas, recalculated 6 Oct 2026), three scenarios on the “Scenarios” sheet. Everything after 6 Oct 2026 is a projection; today there are zero paying customers. Negative cash = shortfall a seed round must cover.

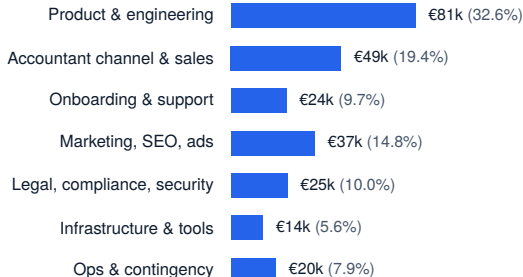

The ask: €250k pre-seed for 19 months of runway

€250,000

€200,000 Vest Ventures Accelerator ticket +
€50,000 from independent angels (not yet identified;
covers the $\geq 10\%$ private co-investment rule)

- 📄 Convertible loan (CLA) or SHA on Vest Ventures' templates
- 📊 Pre-money €1.25M, post €1.5M: founders' proposal, no sourced benchmark
- 🕒 Investors 16.67%, option pool 10%, founders 37.40% + 35.93%
- ⌚ 19 months with zero revenue; 25 months on the base plan
- 🇷🇴 Seed trigger: 100 paying companies, Jul 2028

USE OF FUNDS

Minimum viable close: €150k → 12 months with zero revenue (14 on plan), same cost plan; the developer hire (month 13) falls outside it. Other sizes, zero-revenue runway: €220k (VV + minimum match) → 17 mo; €300k → 23 mo. A smaller VV ticket means a smaller round; below €150k in total is not modelled. The 2025 average Romanian pre-seed round was €526k.

Sources: financial-model.xlsx ("Use of funds" sheet: share of planned spend over the zero-revenue runway applied to the round) and cap-table.xlsx (incl. a CLA alternative). Vest Ventures terms: vestventures.vc programs-terms §3. Average pre-seed: How to Web & Underline Ventures, Venture in Eastern Europe 2025.

Roadmap: from pilots to 100 paying companies and a seed round

✓ 2026: done, then pilot

- ✓ **17 Aug:** development starts
- ✓ **Early Sep:** live in production
- ✓ **17 Sep:** REGES-Online API live
- ✓ **6 Oct:** accountant pilot opens
- 🕒 **15 Nov:** pilot sign-ups close

🚩 2027 (plan)

- 💰 **Jan:** round closes (assumed); founders full time
- 👤+ **Mar:** partner & sales manager
- ↔️ **Apr:** pilot ends, companies convert to paid
- 📊 **May:** payroll values validated by an accountant
- 🕒 **Jun:** accessibility audit (EN 301 549)
- 👥 **Aug:** 30 paying companies
- 🛡️ **Sep:** external penetration test

🧠 2028–2029 (plan)

- 🔗 **Jan 2028:** developer hired
- 🚩 **Jul 2028:** 100 paying companies, seed conversations start
- 📈 **Dec 2029:** 300 paying companies

Beyond the model (a hypothesis, not in the numbers): neighbouring markets such as Serbia, Hungary, Moldova or Bulgaria. REGES-Online is Romanian, so each country needs its own compliance layer on the same multi-tenant core.

Milestones: financial-model.xlsx (base case). Done items: git history and administrativo.ro. Vest Ventures Accelerator Cohort 3 dates are not published; January 2027 is our assumption.

ADMINISTRATIVO

Thank you

€250k pre-seed to turn a live product and an accountant pilot into 100 paying companies.
